

HSE Policy

Bontexgeo's first priority is to protect the health and safety (H&S) of our employees and all others who may be affected by our business activities. We are also committed to improving our environmental performance and protecting the environment, and we understand that achieving these goals fully supports our business goals.

We aim for zero accidents & a minimum number of safety and environmental incidents in Bontexgeo.

To achieve these objectives:

- we always put safety first in everything we do.
- we comply with all legal requirements that apply to our activities in every location in terms of health, safety & environment
- We determine what the most effective work practices are, after which we apply them in our company and create a culture in which everyone commits to follow them.
- we examine which factors contribute to safe behaviour and we ensure that these motivating aspects are present in all situations.
- we determine the causes of unsafe behaviour and we remove these factors in our entire organization.
- We provide all employees with the means to intervene when it comes to preventing or stopping unsafe behavior from our colleagues.
- we provide the necessary means to achieve the safety, health, environmental and ISO 14001: 2015 objectives.
- we initiate programs that give us a better insight into the most important environmental aspects of our activities, both positive and negative, and take steps to reduce or minimize the negative impacts and Prevention of Environmental pollution, where possible by using measures that are specific to each part of our company.
- We continuously develop & maintain the skills and competences of our employees so that they can support our objectives with confidence.
- We continue to improve our HSE performance by measuring what is important, by taking the time to celebrate successes, by sharing best practices and by learning from our shortcomings.
